PERFORMANCE DYNEEMA

Kingfisher performance Dyneema features a high performance 12 strand pu coated Dyneema SK75 core, which is very strong, low stretch, lightweight and easy to splice. The cover is high tenacity polyester which has a good abrasion resistance. Inside the core we have included a special hi grip fibre to improve grip between cover and core.

Spliced breaking strengths

8mm	10mm	12mm	14mm	16mm
3100kgs	4650kgs	6650kgs	8900kgs	11,200kgs
